DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, Claims 11-13, drawn to an isolated polypeptide, classified in class 530, subclass 350.

Group II, Claims 14-19, drawn to a screening method for identifying an agonist or an antagonist, classified in class 435, subclass 7.8.

Group III, Claim 20, drawn to an isolated antibody, classified in class 530, subclass 387.1.

The inventions are distinct, each from the other because of the following reasons:

The products of inventions I and III are distinct each from the other, because they are drawn to products having different structures and functions.

The products of I and III are not used by the processes of II and is distinct one from any other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classifications and recognized divergent subject matter, and the search required for any one of inventions I-IV is not required for any other invention I-IV, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if

Art Unit: 1646

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
